REQUEST FOR RECONSIDERATION

Hon. Commissioner of Patents
and Trademarks
Washington, D.C. 20231

Sir:

Responsive to the December 19, 2001 Official Action, reconsideration and allowance of the present application based on the following remarks are respectfully requested.

The shortened statutory period for responding to this action expired on March 19, 2002. Submitted with the present response is a Petition for the Extension of Time of one (1) month and fee, thereby increasing the time for responding to the outstanding Office action to April 19, 2002. See 37 C.F.R. § 1.7.

Claims 1-13 (Claims 5 and 6 have been withdrawn from further consideration) remain pending in the present application. Claims 1, 11, and 13 are independent claims.

In the Office Action dated December 19, 2001 the Examiner rejected Claim 1 under 35 U.S.C. § 103(a) as being unpatentable over Fukui et al. in view of Gold et al. The Examiner also included the rationale for rejecting Claims 2-4 and 7-10 under this same ground of rejection. The Examiner also rejected Claims 11-13 under 35 U.S.C. § 103(a) as being unpatentable over Fukui et al. in view of Gold et al., further in view of Takeuji et al.

These rejections are respectively traversed.

Applicants appreciate the courtesies extended to Applicants' representative during an interview held on April 17, 2002. At the interview, Claims 1-4, and 7-13 were discussed. Applicants' representative pointed out that the limitations, as recited in each of the independent claims, of a circuit pattern, an inner electrical component electrically connected to the circuit pattern and a molded resin section molded so as to cover the circuit pattern and the inner electrical component, and the molded resin section having at least an opening allowing an outer electrical component to be connected to the circuit pattern. Applicants' representative also argued that there was no teaching in any of the applied primary reference to Fukui et al. Applicant's representative also pointed out that the secondary reference to Gold et al. was directed to an internal heat sink in an IC package. The IC package of Gold et al. failed to provide the necessary teaching to be combined with the primary reference of Fukui et al. because there was no guidance or motivation found in Gold to modify the teachings of Fukui et al. to arrive at Applicant's claimed structure and method. The Supervisory Primary Examiner agreed that the combination may not be proper, and will reconsider the combination of these references upon the filing of a response to the Office action.

As set forth during the interview, Claims 1-4 and 7-10 are patentably distinct over the applied references to Fukui et al. and Gold et al. In addition, with respect to Claims 11-12, and as discussed during the interview, the Examiner's allegation that the Takeuji et al. reference provides a teaching of a circuit structure as recited in the claims in a microwave oven is without merit. Likewise, the method of Claim 13 is not obvious in light of the references.

In view of the foregoing, the claims are now believed to be in form for allowance, and such action is hereby solicited. If any point remains in issue which the Examiner feels may

be best resolved through a personal or telephone interview, he is kindly requested to contact the undersigned at the telephone number listed below.

All objections and rejections having been addressed, it is respectfully submitted that the present application is in a condition for allowance and a Notice to that effect is earnestly solicited.

Respectfully submitted,

PILLSBURY WINTHROP LLP
